SUBSCRIPTION \$2.00 PER YEAR

## LOCAL NEWS ITEMS OF THE TOWN AND DISTRICT

Mr. and Mrs. A. F. McCullum are holidaying in Banff and vicinity.

Born to Mr. and Mrs. R. Cunningham a girl.

Mr. and Mrs. Eugene Lester of Red Deer have been spending their vacation in Gleichen visiting relatives.

Saskatoon berries are now at their best. At many places along the river there are some but there are places where they are in abundance. The job is to find these places. Monday Jack Lester, the town engineer, assisted by Cam Evans with his tractor has been busy leveling the rough spots in the roads in town. These rough spots which have been in existence for some weeks were a misery for car drivers. The driver had to concentrate on his job and not admire the town windows and the girls on the street.

Mr. and Mrs. Bob Haskayne expect to leave for the mountains this week for a well earned rest.

Mr. and Mrs. Elmer Bolinger and children have moved to the residence in town they purchased from Chas. Thompson. Elmer thinks it is great fun moving since he cannot find anything he wants.

In the 14th century when Venice imported sugar from the Orient it was so costly that only the wealthy could afford it.

Rapid progress is being made in the construction of the new highway east from Gleichen. The new road, known as the Hill road, has been cut down and regarded to standard width for paving. The construction outfit is now working on the foot of the hill towards Gleichen. Amie Plante and George Souter have the contract for moving the fence to permit the construction of the wide road.

Daniel Cochrane who had been a resident at Evedale Home for more than five years died last Friday evening at the age of 82 years. He was born in Scotland and came to Glenora.

**SEEDTIME

HARVEST**

Dr. J. J. GRANEY  
Lecturer  
Lecturer in Service  
L. B. Thomson, Director, P.F.R.A.  
The recent appointment of Dr. L. B. Thomson, Superintendent of the Prairie Farm Rehabilitation Administration, succeeding Mr. J. J. Spence, is one that should give encouragement to all farmers, technical agriculturists and agricultural organizations in Western Canada who realize what the development of a proper and effective soil conservation and land use program means to the future welfare of farming in Western Canada.  
Mr. Thomson is well known to farmers and technical agricultural organizations in Western Canada. For over 20 years he has been closely identified with the activities of the P.F.R.A. His leadership in the battle against drought and soil erosion has been of the highest order. Indeed, it is in Western Canada that he is best qualified by training, experience and ability to direct the future activities of the P.F.R.A. than any other man.  
Thomson. His vast store of practical and technical knowledge of prairie soils — their potentialities, limitations and peculiarities — will be an important asset in the development of a sound, permanent soil conservation and land use program for Canada. In the years since the formation of the P.F.R.A. under Mr. Thomson's leadership, will assume very great importance in the future economy of Western Canada.  
The main functions of the P.F.R.A. are, of course, the rehabilitation and improvement of our prairie soils. This involves the conservation and proper utilization of our soil and water resources. It includes not only the preservation of the soil itself, however, but also the improvement of the soil through the use of natural materials, mineral fertilizers, efficient cropping methods, irrigation, drainage and flood control.  
The Land Elevator Companies associated with this Department extend to Mr. L. B. Thomson, and his experienced staff of agricultural experts, every service in all their P.F.R.A. undertaking.

Alan Mills, baritone singer and guitarist of Montreal whose Sunday song programs have won him a wide audience among the younger listeners. He sings on the CBC Trans-Canada network and with each song tells a story of his origin. To his programs, Alan Mills brings a seemingly endless supply of songs, tunes and ditties in the "traditional" manner most of which became his repertoire during several years in minstrel shows, grand opera and on the stage.

Progressive Conservative party has withdrawn from provincial affairs in Alberta but it is generally believed that the party supporters will vote independently. The independents are expected to have about twenty candidates for the sixty seats in the legislature. The liberals will contest at least 50 seats and have some hope of defeating the government. The C.C.F. socialists' prospects are difficult to assess. After their heavy loss of rural seats in Saskatchewan (they lost 16) they are not expected to make any inroads in the 50 seats outside of Calgary and Edmonton.

### MORE FOR A SHIRT?

With the improvement in Canada's U.S. dollar supply there is increasing expectation that Ottawa may soon begin to enlarge the present quota on imports from the United States. Quota exporters, however, are not expected to have about twenty candidates for the sixty seats in the legislature. The liberals will contest at least 50 seats and have some hope of defeating the government. The C.C.F. socialists' prospects are difficult to assess. After their heavy loss of rural seats in Saskatchewan (they lost 16) they are not expected to make any inroads in the 50 seats outside of Calgary and Edmonton.

In its provincial elections Alberta has the transferable ballot in fifty constituencies and proportional representation in the other cities. It is expected to have about twenty candidates for the sixty seats in the legislature. The liberals will contest at least 50 seats and have some hope of defeating the government. The C.C.F. socialists' prospects are difficult to assess. After their heavy loss of rural seats in Saskatchewan (they lost 16) they are not expected to make any inroads in the 50 seats outside of Calgary and Edmonton.

Don't wait until 5 p.m. to pick your groceries for a supper salad. Early morning is a good time to gather fresh vegetables after a cool night has given the leaves a chance to revive from the scalding heat of the day before. Rinse in cool water, drain, and store in refrigerator for crisp freshness. Specialists state that leafy green lettuce is more nutritious than the paler head lettuce.

Dang G. Gow, age 75 died at Evedale Home Friday evening. He had been a resident at the home for some time. He was born in China and had lived in Canada for almost 50 years. The funeral took place Saturday afternoon with Major Brundage of the Salvation Army officiating. Interment was made in Evedale cemetery.

### An English Journey

By Walter Legge representing the Canadian Weekly Newspapers Association.

It looks to an outsider as if rationing has been retained over long and when we arrived we noticed, a tremendous agitation to relax restrictions on certain articles, notably shoes, dry goods, and clothes. It was widely reported that warehouses were bulging with merchandise that people have no coupons to buy. There is more fresh fruit available but bananas are only sold on allotment and are only sold for children. The days when eggs were obtainable at about one egg a month have long past and while still not plentiful are obtainable in small quantities. This, we were told, is a scarce article condition.

The meat ration is pitifully small. Our hosts last week cut their weekly allowance of meat, for the whole family and ourselves, and we ate it all.

The town is now calling upon all owners of dogs to get boys and buy a license for the greatest friend man has. Judging by the number of dogs on the streets these days quite a bit of revenue should pour into the town coffers. If you don't get a dog tag pretty soon Bill Phipps, the town secretary, states he will go up the street with a pistol in each hand and guarantee each pistol will make a hole and a noise.

Alberta Pool Elevators Ltd. Farmer Owned Co-operative

at the meat. It was a small roast of about two pounds. We are told that meat people do the same thing, as it is foolish to try and spread it over several meals.  
Eggs allowance is two ounces per person per week which is only about two small slices.  
While the above would tend to show that there is not much to eat in England today, the fact is that everybody gets plenty to eat. The English still eat at least four times a day, for no one seems to be able to dispense with afternoon tea about 4.30 p.m.  
But the real trouble is there is too much money about the meals, which are too starchy. There is too much bread, plain cake and vegetables and not enough variety.  
I have been staying at the homes of relatives all the time I have been in England, but have eaten lunch, dinner or tea at home.

In all the houses, the housewives complain that it is extremely difficult to make appetising dishes out of the same ingredients day after day.

In the hotels and restaurants the average meal consists of a thick soup, which seems to be made with some starchy powder; a woefully small piece of mutton; beef or fish, or a small pie made of ground-up meat, and an overly large helping of potatoes, and some kind of vegetable, usually cabbage, cauliflower, or greens; and a dessert usually made of some kind of cake or steamed pudding with a custard sauce. Tea or coffee is not included with the meal, but may be purchased separately.

Chicken is not rationed but is extremely scarce and very expensive, so it is seldom seen.

Therefore the best things for Canadians to include in parcels to friends or relatives in England are canned chicken, pork products, salmon, or other fish, sugar, cheese, raisins or currants, which are absolutely obtainable, jams and jellies if in time. Butter arrives in excellent condition if packed in air tight tins.

Second hand clothes in good condition also are welcomed and very (Continued on last page)

## The Trend of World Trade

WORLD TRADE IS ALWAYS a subject matter of great importance and the present situation, Great Britain, always an important trading nation, has, because of the serious dollar shortage there, been forced to look more and more to those countries which are within the sterling area for the goods which she must import. Consequently in Canada, which is a "dollar country" there is some anxiety as to whether Britain will continue to buy the greater part of her imported food supplies here, or whether some of this trade may be diverted to countries within the sterling area. There is reason for some concern over this matter, since there are many indications that Britain intends to increase her purchases of food from those countries where the dollar shortage is not a consideration.

### May Become A Competitor

It is believed that Australia may become one important competitor in supplying the British food market. Recently, Sir Henry Turner, of the United Kingdom Food Ministry, commenting on discussions which has taken place with the Australian government regarding large scale food production there, said that Australia might become a vast granary for Britain and much of Europe. The British colonial territories in Africa and other parts of the world are likewise increasing food production and may soon be in a position to send supplies to the United Kingdom. A plan to raise millions of pigs, to supply bacon to the British market, is now under way in Queensland, and it is also planned to sow large areas in sunflowers, from which oil can be obtained to make margarine, which is widely used in Britain.

### Plan Expansion In Australia

There are also plans for great expansion in the production of meat and eggs in Australia. In East Africa arrangements are being made to raise vast crops of ground nuts, a source of fats and oils, and food production is being increased in other directions. To prevent the world food situation in such that there are markets for all that is produced, and we have recently been warned that Canada will be required to experience shortages in some things as a result of this competition in the European food program. There is no doubt, however, but that the future is uncertain, and that in all probability there will be many adjustments in the pattern of the world trade. It is to be hoped that Canada will not find markets for her farm products depleted as a result of this apparently inevitable adjustment.

### Tips On How To Keep Cool

NEW YORK—Stop talking about the heat and humidity, and just relax—if you want to be cooler.

### FUNNY And OTHERWISE

In the course of an English lesson the teacher wrote on the blackboard: "He was bent on seeing his friend."

"Now, Charlie," he said, "I want you to study that sentence and tell me in your own words."

"One hundred dollars was found in an ice box bought at an auction."

"He had arrived home late, and his wife was giving him a piece of her mind. 'I don't care, my dear,' he said, getting really worked up. 'I mean exactly what I say. 'I'm a man who calls a spade a spade.'"

"His wife nodded. 'Maybe, Henry,' he said with biting sarcasm, 'but you don't call a club a club; you call that working late at the office.'"

"Mistress (hearing chime on kitchen): 'More dishes, Mary?'"

"Mary: 'No, ma'am.'"

"She (poetically): 'Isn't that sunset glorious, Harold. The bars of red and gold are Nature's own effort to make a sunset a sight to behold.'"

"He: 'Yes, dear, it put me in mind of something, too, I can't think where it is. It's a lovely one, or a plate of sliced tomatoes.'"

"Woman (in a crowded bus): 'I wish that good-looking man would give me a ride home.'"

"Centenarian: 'Yup, I'm 100 years old. Bub, and I'm proud to say I ain't got an enemy on earth.'"

"Repetitor: 'That is a very beautiful thought, sir.'"

"Centenarian: 'Yup. Last one died 'bout a year ago.'"

"An English class was given the task of writing four lines of dramatic poetry. One boy wrote: 'Water.'"

"The class was coming fast. The boy stepped off the railroad track. To let the train go past."

"While walking on the menu and there was no particular run on it, so the waiter was surprised when a line of customers doubled up on it. 'You're fond of white steak, sir?' the waiter asked."

"Well," the diner explained, "I was waiting for this opportunity for a long time. My name's Jonah."

### Days Of Peace Tough As War, Says Churchill

PERTH, Scotland. — Winston Churchill, accepting the freedom of the city with honors heretofore only given to Royalty, warned that the days of peace were no less difficult than those of war.

### Predicts Man May Fly Like Birds

CAMBRIDGE—People may be able to fly like birds in 50 years, says Roger Babson.

The economist told an 1888 class reunion at Massachusetts Institute of Technology.

"There probably will be discovered some product which insulates against gravity," he said, "and make it possible for an individual to stand on something three feet square and a few inches thick and eliminate his weight so that he could fly personally with or without the aid of a motor."

### Night Driving Can Be Very Dangerous

Driving in the dazzling light of an oncoming car is dangerous business, dangerous alike to the dazed driver and the dazzled. And it is so unnecessary.

To dim the lights of a car is so simple and easy a task that it seems that the danger involved by not doing so would tempt a motorist approaching another car at night to take this simple precaution.

When preserving in water-glass a five-gallon crock or jar, being sure it is thoroughly clean and dry. Being nine quarts of water to boiling point and, when cool, place it in the crock. Add one quart of water-glass (sodium silicate), and stir and mix thoroughly. Put in the eggs.

This quantity will be enough for preserving 14 to 16 dozen eggs, which may be immersed in the solution all at one time, as they accumulate.

Be sure that the solution is always at least two inches above the eggs at all times. Cover the crock to prevent evaporation.

## Population Trend Worries Great Britain

### Fear Within Next 20 Years Nation Will Be Composed Mainly Of Very Young And Old

LONDON. — Britain lives in the shadow of an impending population crisis.

That is the opinion of population experts who see the country in danger of becoming a land composed mostly of the very young and the very old within the next 20 years.

The reasons, they say, are a retreat from parenthood and a draining of middle-aged groups through migration.

These are the main findings of a report just issued by Political and Economic Planning, an independent, non-party, fact-finding organization. It has been probing population trends since 1928.

To counter these population prospects for Britain, the report suggested adoption of a "population policy" by the government. This should strive to increase the average family size by 2.5 children and create conditions where people will want, as well as be able, to have "four or five" children.

The report predicted that Britain's population will reach 60,000,000 in 1950, 1,800,000 in 1970. At the same time that of western, central and northern Europe will be down by 8,000,000, that of southern and eastern Europe by 27,000,000 and that of Russia up by 77,000,000.

The report also suggested that in the next 20 years population growth would halt in Canada, Australia, the United States and among white South Africans. But it expects to continue "for several generations" in South America.

The report said that migration of the young and vigorous to the Dominions (all now make Britain's age structure still more disadvantageous).

This could be prevented only if the Dominions accept "an appropriate percentage of those who are a burden on the community." But prospects of other countries admitting a cross-section of Britain's population "are bright."

The report also found that the present increased birthrate in Britain may well be a temporary consequence of the war. It expected numbers soon would cease to increase and the population of elderly people "will grow from year to year."

**THIS SAILOR REALLY STARTED SOMETHING**

SAN FRANCISCO—Fred Rutzet, 65, retired seaman, put out his yogi suit and went on a fire escape.

A woman on the street screamed. A bartender came out of a corner saloon and belted "Fire's going to jump."

Neighbors screamed, "Fire!" Someone called the police, who learned that:

Rutzet's yogi suit is long underwear.

"It's all yogi. While I was a seaman on the Great Lakes I saw a sign in Chicago: 'Indo psychology taught here. I learned yogi-inhale six, stop for 16 heartbeats, exhale right.'"

"If it wasn't for yogi I wouldn't be here," Rutzet told the cops.

That explanation seemed to satisfy everyone.

## OUR COMPLETE SHORT STORY

## TOO OLD TO APPRECIATE

By HANK MCALL

SALLY GIBSON had been raised in a gentle home, but her miffing was used to hear as she scowled at a white wake of a fat man in a speedboat. She flipped her tiller over hard, ducked under the boom, and swung her cutback into another tack.

Once steered on her new course, she appeared sail water out of her hair and brushed the brine off her long brown legs and bathing suit.

The river had drenched her with a solid sheet of foam.

"The fool," she growled, "there ought to be a law to keep such clownish off the water. My rash, here comes another one!"

A black, speck spouting white wings was skipping down the channel, seemingly headed straight for her. She kept her eyes on it determined not to get another ducking.

In the meantime the boy in the first boat had turned around and was skimming back to give her a second shower. It wasn't every day a good-looking girl was caught alone in the middle of the channel.

Sally, unaware of the approaching attack from her stern, focused on the new menace. The boat whizzed by within five yards. As she turned to shake her fist, her eyes glimpsed the returning sport. It was too late to do anything. The original torturer was on her!

He aimed to pass at six inches. Then there was a splintering crash. Sally arched through the air, screaming, "Watch out!"

He bobbed up clear, his wrecked hull, swam over it, and held on while her breath came back. She felt the sleek mahogany board under her water as it slowed to swing back for a rescue.

A life ring splashed beside her. She heard a voice. "Oh, my all right?"

"It won't sink. Get me out of the water."

The grinning face of a tanned young man peered down. Her temper snapped.

"Don't you laugh at me, I'm going to put you in jail, you see!"

Her tears cut her off. She felt a strong grip under her shoulders and then the varnished deck beneath her fingers. For several seconds she lay there sobbing.

"I'm awfully sorry, honest. I didn't mean to—"

Sally regained her self-control. "You better be sorry. Don't stand there gawking, get a line on my boat before it sinks."

"It won't sink. Sit down, I'll get it."

He took in the sail, bubbling to himself. "What a courageous creature! What an introvert! If I can only smooth this thing, my brother Roger's eyes will pop out."

The line secured he turned to Sally and said, "Well, you'll be back to our landing, and half it, you see, you must want my name. I'm Bill Henson. I'm staying at my brother's cottage. This is his boat, by the way."

"You don't care whose boat it is. You're the man who hit me and you're the man who's going to pay."

"Don't look at me in that tone, you see. I'm just a poor student on a vacation. My brother's the only one who's family with any money. You'll have to talk to him."

"You certainly are a fine one. Your brother didn't hit me, you did. I suppose it was all his fault?"

"Bill granted and held the line away from his propeller as he eased around to head up the channel. Then turned to his passenger.

"Don't sit there and sulk. The damage is done, you're not hurt. Roger will fix everything, so we may as well be friends. What's your name, Miss Fitzball?"

"Sally Gibson. The damage is done. Look at the rents in my sail. And the hull, I hate to think of all the holes in it. I hope your brother hasn't enough money to buy me another boat. If he doesn't, off to jail you go!"

"Money? Roger is made of money. He's been making it for years, never even took time off to get married or go to college. He'll fix everything, don't worry."

"They have asylums for lunatics like you. You'd be in one of them. Don't be so bitter. I have been just trying to have fun. You have got to be a big thrill if that was hadn't knocked me into you."

"Oh, so it was a wave! Not your fault at all. You're going to have a hard time proving that."

"This was nothing. Bill steered for a private dock. In the background a green lawn spread out to a trim white cottage. A white pebble walked up to its porch.

"Here we are. That looks like Roger sitting on the dock. He's not going to like this, too old to appreciate it."

A tall lean man of about thirty looked them over closely, frowned at the half-submerged toy, and said, "Here we are, you in now, Bill?"

"Aw, Roger, don't get riled. I just had a little accident. This is Miss Sally Gibson."

Roger made Sally sit down and explain matters. Bill went off to haul up the boat. Sally found it astonishingly easy to make her case with the older brother, whom she found pleasant and understanding.

He reached a generous agreement over the repairs and walked down to the beach where Bill was struggling.

Bill announced, "Doesn't look like much damage. It's really getting too dark to tell much. I'll run you home now, Sally, and tomorrow afternoon I'll call on you."

We can settle this business and then go for a real boat ride. How does that sound?"

It was about three o'clock when Bill escorted Sally to the Gibson home.

Mr. Gibson himself answered the door. "Hello, I'm Bill Henson. Is Sally in?"

"No, son, she went for a speed boat ride. Look, these are the girls now."

"In that boat? Why, that's too late to do anything. That guy's she's snuggled up to?"

Mr. Gibson took a long puff on his pipe and smiled. "Well, son, I'd say that must be your brother."

(Copyright Wheeler Newspaper Syndicate)

## New Brunswick Uses Unique Balloting Plan

FREDERICTON.—The system of balloting used in the June 23 New Brunswick general election is believed unique in Canada.

Each party prints ballots containing only the names of its own candidates; or a voter can use a blank piece of paper supplied by the returning officer.

When a voter enters the polling place he is handed one party-printed ballot by each party contesting the seat. He is also given an initiated envelope by the returning officer.

The voter enters the booth, marks the ballot of the party he wishes to support by placing the usual "X" across the name of the party's candidate or the riding, and places it in the envelope. He does not seal the envelope.

The returning officer examines the envelope to make sure it is properly furnished by him. Then, in the presence of the voter, he drops it into the ballot box.

If a voter requests it, the returning officer will furnish a blank slip on which the voter may write or letter the names of candidates for whom he wishes to vote.

When the ballots are being counted, any envelopes containing more than one ballot is closed spoiled and all ballots in the envelope are invalid.

If he wishes, however, a voter may strike out any name appearing on the party ballot and write in the name of another candidate.

In this way, a voter may use a party ballot but vote for members of another party or split his vote. Thus, in a riding where there are four candidates, a voter could vote for two on the party ballot, strike out the remaining two and add the names of the two candidates of another party.

If he adds the name of a person not nominated as a candidate or adds more candidates than there are members to be elected in the riding, the ballot is spoiled.

## BRITAIN'S NEW ALUMINUM CAR IS LOW PRICED

LONDON.—Britain's first factory-produced all-aluminum car is ready. On Britain's standard gas ration, which gives a 90 mile a month mileage for ordinary cars, this small three-wheeler will give two adults and a child 500 miles of pleasure motoring. Gas consumption is over 100 miles to the gallon. This machine hums along the road at a comfortable thirty and climbs gradients 1 in 4 with ease. Maximum speed is 40. Total weight of the car is under 200 pounds and the overall length is eight feet. Running costs are almost nil, because there's nothing to go wrong. This runabout will certainly be popular in Britain where the gas ration is small. The price will be popular too. It costs \$600.

An unenviable form of DDT was invented in 1947 with excellent storm-proofing properties. 4785

LONDON SEES GUARDS IN SCARLET AND BEAUMAINS AGAIN—Replenished in pre-war scarlet, white and black uniforms, famed British Guards regiment gave London its most colorful show of the year when the traditional trooping of the color ceremony took place. In full dress uniform, Guards marched past the saluting base. Representatives of the King and Duke of Gloucester took the salute.

## HOME ECONOMICS INSTRUCTOR SAYS 86c A DAY CAN PROVIDE NOURISHING MEALS

DAVIS, Calif.—A housewife with a caloric-conscious eye and a firm grip on her pocketbook can produce three nutritious meals a day for 86 cents.

Miss Laura Morse, home economics instructor of the University of California College of Agriculture, says it's an adept scoring price.

But if the housewife thinks only of the pennies saved and ignores the nutritious lost, her 86 cents will provide a diet far short of a person's food needs, Miss Morse maintains.

The girl's home economics class prepared two sets of meals, each costing 86 cents in all for breakfast, lunch and dinner.

They don't claim the following meals to be delicious, but they insist they're nutritious.

Breakfast would include a soft-boiled egg, two slices of wholemeal toast, butter and grapefruit juice.

One lettuce and cheese sandwich on wholewheat bread, pea soup, lettuce salad with mayonnaise, prune whip and milk would be the entree lunch.

Finally, the model meal for dinner would be fried liver, one baked potato, sliced raw carrots, cabbage salad and mayonnaise dressing, applesauce and milk.

Miss Morse lists the likes of potato salad, cupcake, baked beans, avocado salad and apple pie as tasty—maybe—but low in food value.

She has helped prepare a chart—H.D. 460—Checking Food Values in the Daily Diet. With this one eye on the grocery store specials and the other on the chart, the housewife can plan her meals to get the most food value for her money, Miss Morse says.

## REAL CO-OPERATION IN NEW YORK COURT CASE

NEW YORK—Max Luman appeared in court to collect \$11 from James Hammond for damage to Luman's automobile. When Hammond said he couldn't pay, Magistrate Hyman Bushel suggested the matter be settled by both Luman and Hammond sending \$5 to the New York Heart Association. Hammond agreed on condition that the magistrate donate \$5 also. The heart association got \$15.

## HAZARDOUS JOB

JOHN HENRY, N.Y.—Florence Bebel, 32, is not so sure she likes baby-sitting. She was treated at a hospital for facial laceration after her charge, a neighbor's four-year-old, struck her with a golf club.

## HOBBIES

Some people save up funny things—Old clocks, old maps or lamps. Old books, or bugs, or bumperstamps. Postmarks, trade marks or stamps. Perhaps it's china, silverware, or whatabout by scores.

No matter what his hobby is, they still keep waiting for a T. B. Glave.

## PEGGY

## FAMOUS TAPESTRY

The Bayeux Tapestry, famous for its 2000 feet and 231 feet long, depicting in colored woolen threads the invasion of England by William the Conqueror, is divided into 72 compartments.

The chart lists other delectables besides fried liver and prune whip, she adds hopefully.

## TRAPPER FOUND BEAVER A VERY GOOD PARTNER

THE PAS. Man—Of interest to residents of Thicket Portage, the centre of Manitoba's revitalized beaver industry, is the report of last summer's study by J. B. Nash, University of Manitoba biologist, who described a strange engineering partnership between a trapper and his beaver.

The trapper was the late Joseph Hermansky, who died suddenly last fall. Mr. Nash describes how Mr. Hermansky built portions of a dam on his trap line on MacLaren's Creek during the day, and the beaver finished his work each night.

So closely did the trapper and the beaver work together that Mr. Hermansky finally built just the heavy cribbing portions of the dam, confident that next morning all the chinking and filling would be done by the beaver. The plan worked and the dam still stands.

So closely did the trapper and the beaver work together that Mr. Hermansky finally built just the heavy cribbing portions of the dam, confident that next morning all the chinking and filling would be done by the beaver. The plan worked and the dam still stands.

**CALIFORNIA POWER CONSERVATION NECESSARY IN SOUTH.**

**RATON RIVER NEEDS**

**Power Demand Exceeds Supply**

**We Hesitate to Say... IT CAN'T HAPPEN HERE!**

**I'm carrying a heavy load!**

Alberta has been enjoying a fortunate position in regard to her power needs compared to many places on this continent. Newspapers and ads in a great many localities cautioned against the unnecessary use of electricity and in some cases rationing of power had to be put into effect.

Here in Alberta the ever increasing demand caused by the post-war building boom and industrial expansion has been successfully met and we hope we shall continue to be able to do so.

Alberta's progressive expansion is in the interests of everyone in our province and, in spite of present difficulties in the way of our plans for further power development, we want that progress to continue so that Alberta will reach her true place in Canada's destiny.

THE SENSIBLE USE OF ELECTRICITY IS MONEY IN YOUR POCKET AND POWER IN RESERVE FOR EMERGENCIES

**Do YOU need a  
Farm Loan?**

One farmer's financial needs may be quite different from those of another. If you need a loan to finance some undertaking on your farm, we invite you to discuss it personally with our local Manager. He can offer you the wide experience and knowledge of The Canadian Bank of Commerce in farm financing. Many farmers have benefited by the financial help and sound advice given by this Bank.

*You can obtain many advantages under the Farm Improvement Loan Plan. Our local Manager can give you full particulars.*

## What To Do For **SUNSTROKE**

The signs and symptoms are:—the face is very flushed; the pulse quick and bounding; the breathing is difficult; the patient develops sickness, faintness, giddiness, thirst; the skin becomes dry and burning. A very high temperature, stertorous breathing and insensibility (either stupor or coma) may ensue.

**TREATMENT:**

1. If breathing is absent **perform artificial respiration.**
2. If **breathing is present, lay patient on his back with his head turned to one side.**
3. **Raise the head and shoulders.**
4. **Remove the patient to a cool, shady spot, and strip him to the waist.**
5. **Sponge the body with cold water continuously, and apply ice bags to the head and spine until the symptoms subside.**
6. **Fan him vigorously.**
7. **When consciousness returns give Epsom or Glauber Salts, a tablespoonful to a tumbler of water.**
8. **Give drinks of cold water freely.**
9. **Give no food or fluids whatever by the mouth while patient is insensible**
